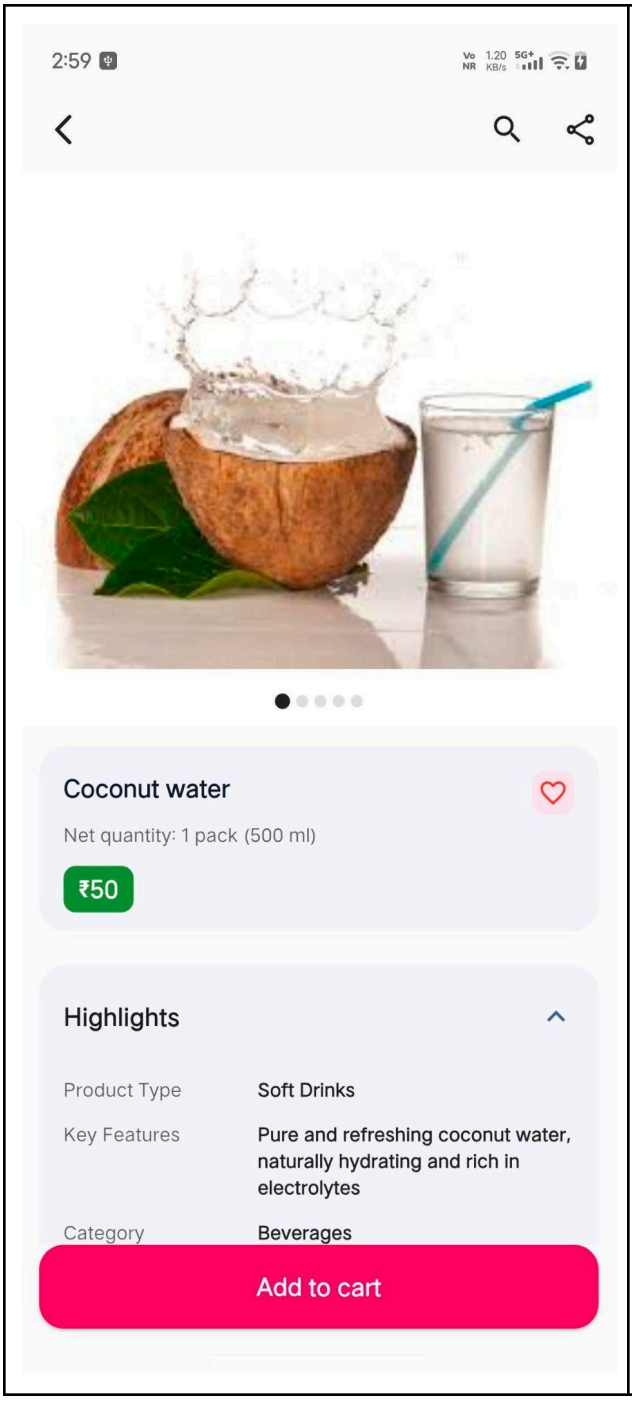
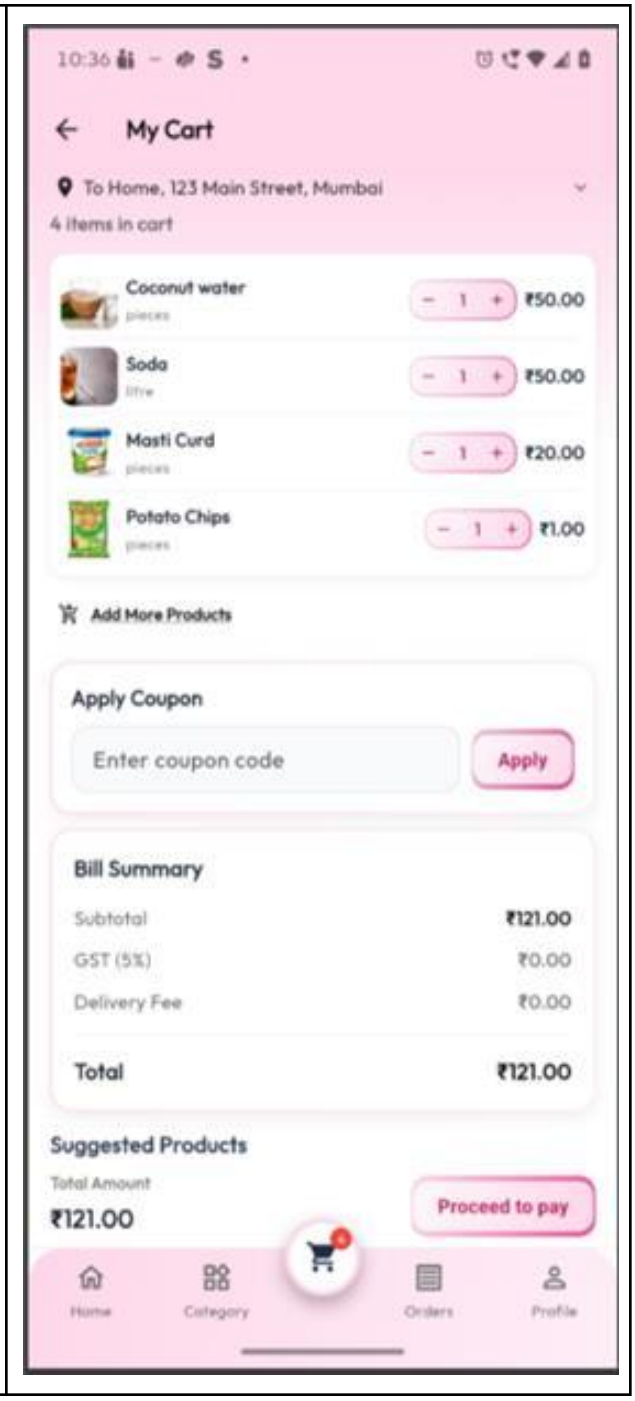
Product Detail Screen and Cart Screen:

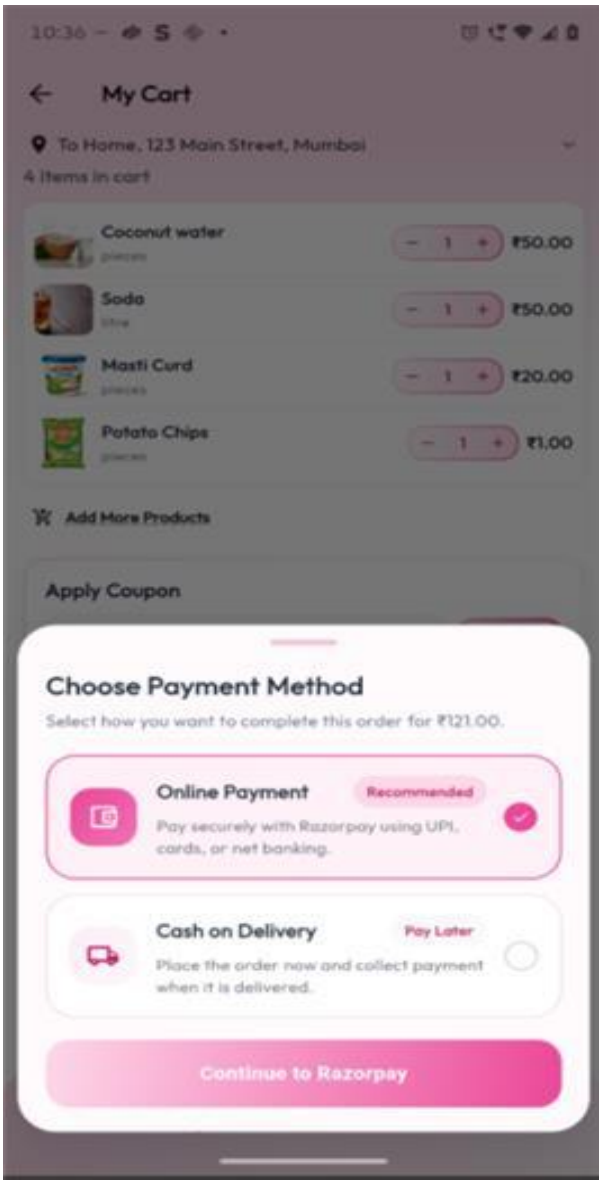
Implemented cart functionality with add/remove items, quantity management, and dynamic price calculation.

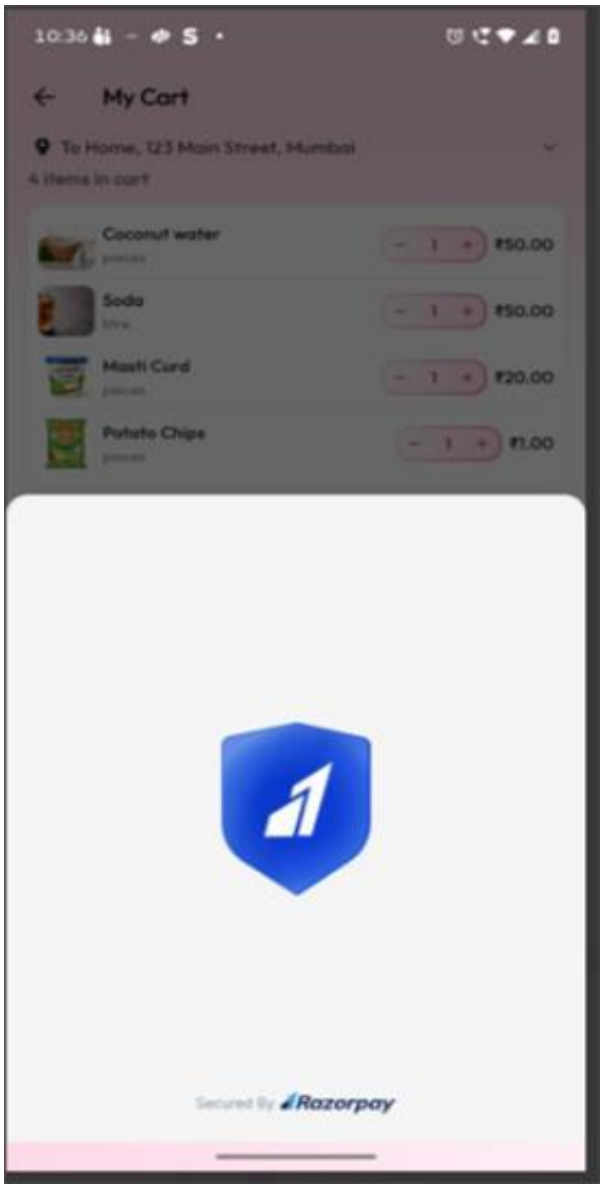




Payment Option Screen and Razorpay Screen:

Implemented payment module with order summary, payment method selection, and secure transaction handling.

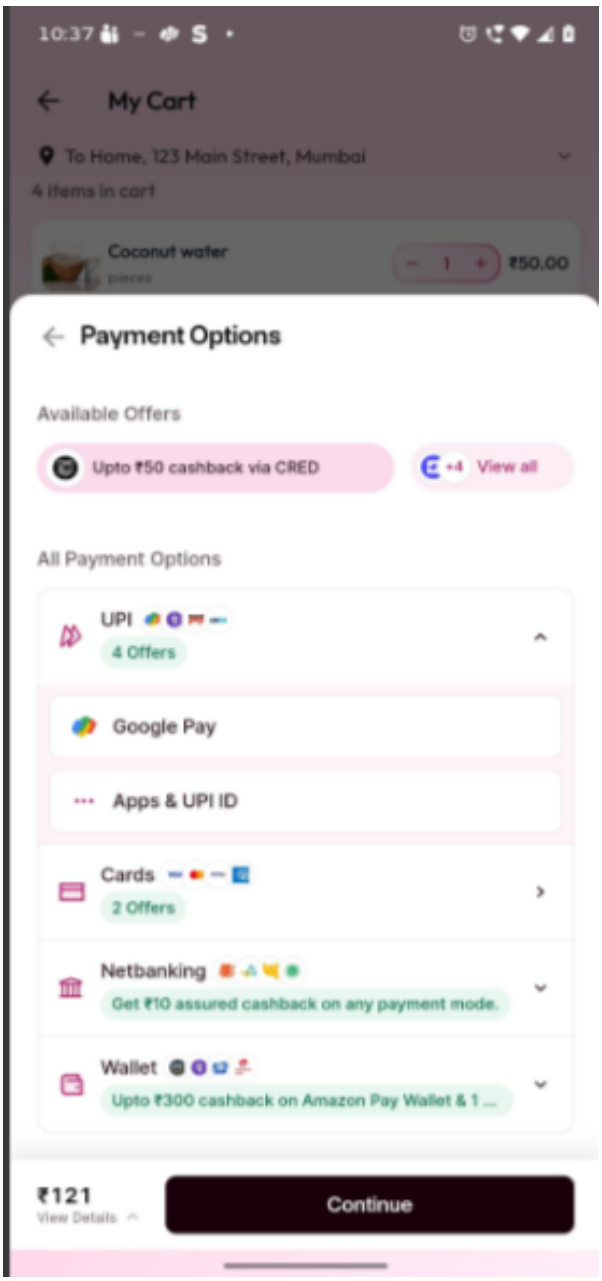


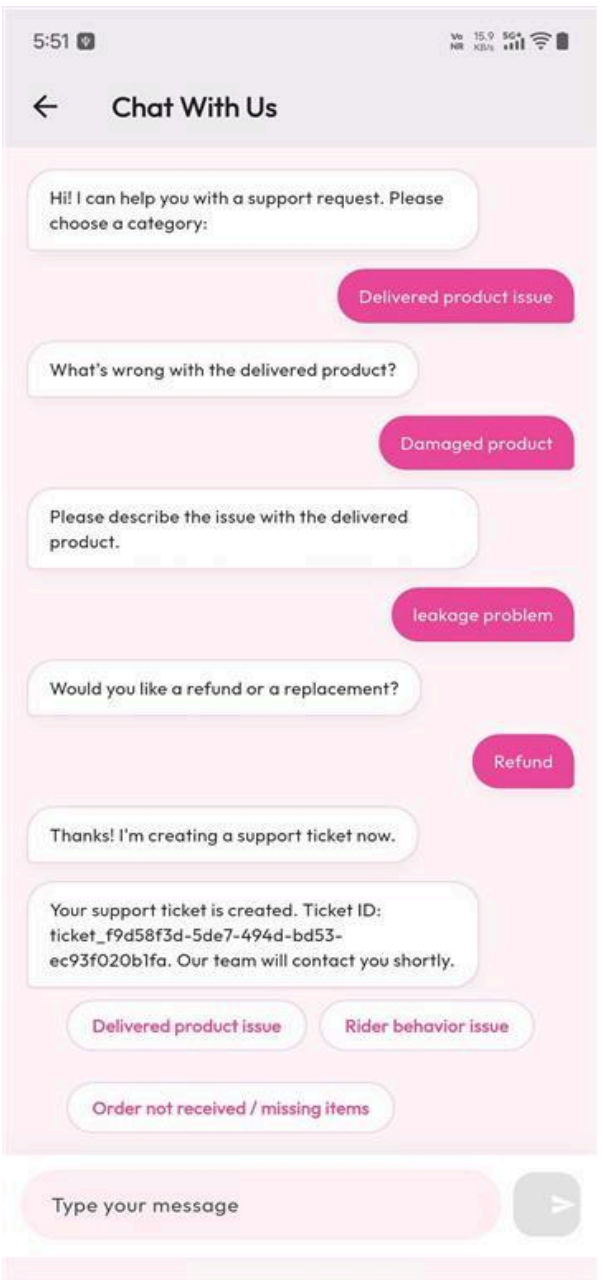


Payment Method Screen and Customer Support Chat Screen:

Integrated Razorpay payment gateway for secure online transactions and seamless checkout experience.

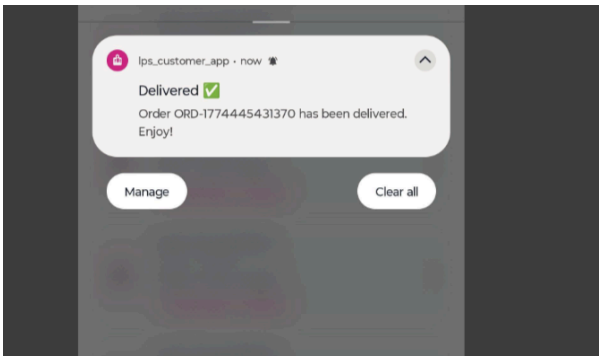
Implemented in-app support chat functionality for instant customer assistance and issue resolution.

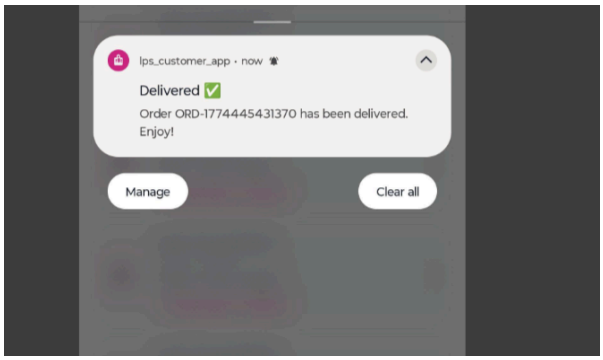




Push Notification Screen:

Implemented Firebase Cloud Messaging (FCM) push notifications to deliver real-time order updates, offers, and user engagement alerts.





SAAS-DRIVER APP

Splash Screen and onboarding Screen:
Driver app splash and onboarding screens developed to provide delivery partners with a smooth introduction to the delivery workflow and features.

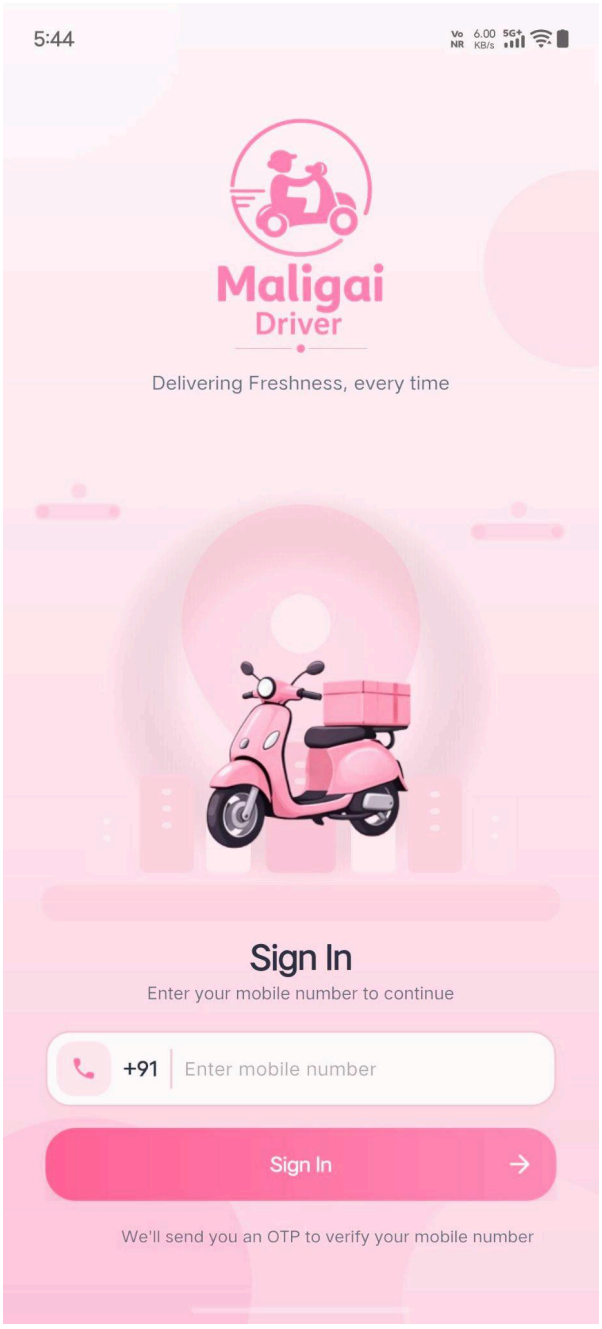
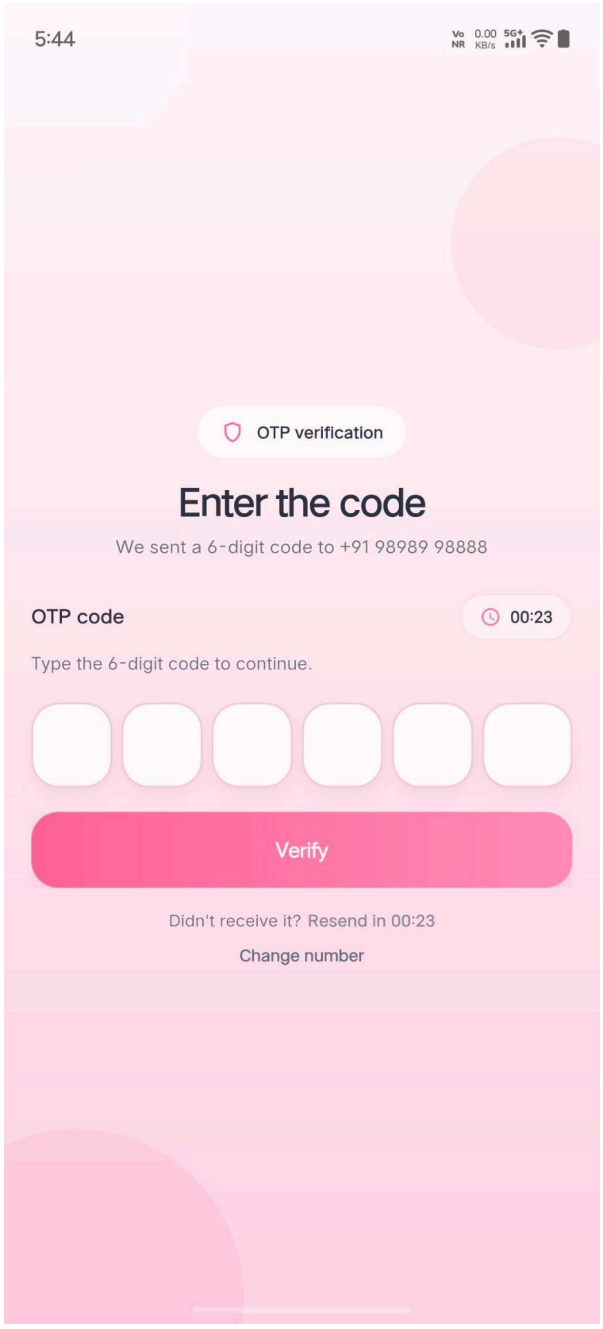
Login Screen and OTP Screen:

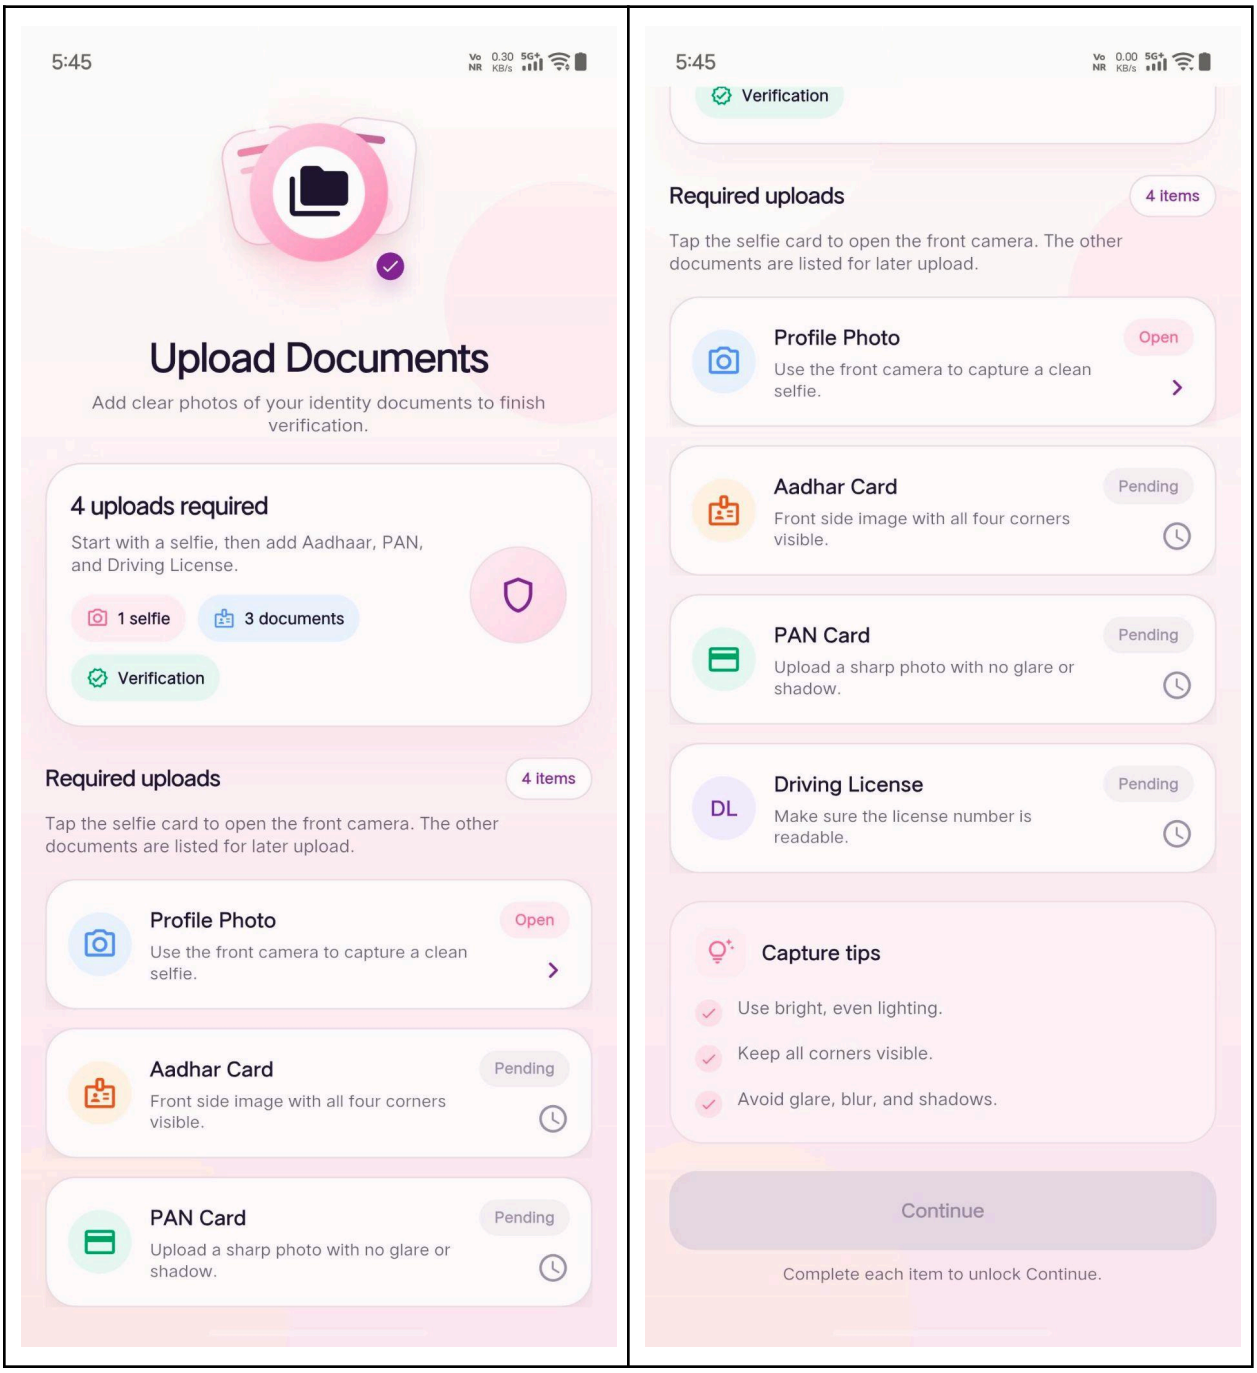
Implemented mobile number login and OTP verification functionality with secure authentication and responsive UI design.





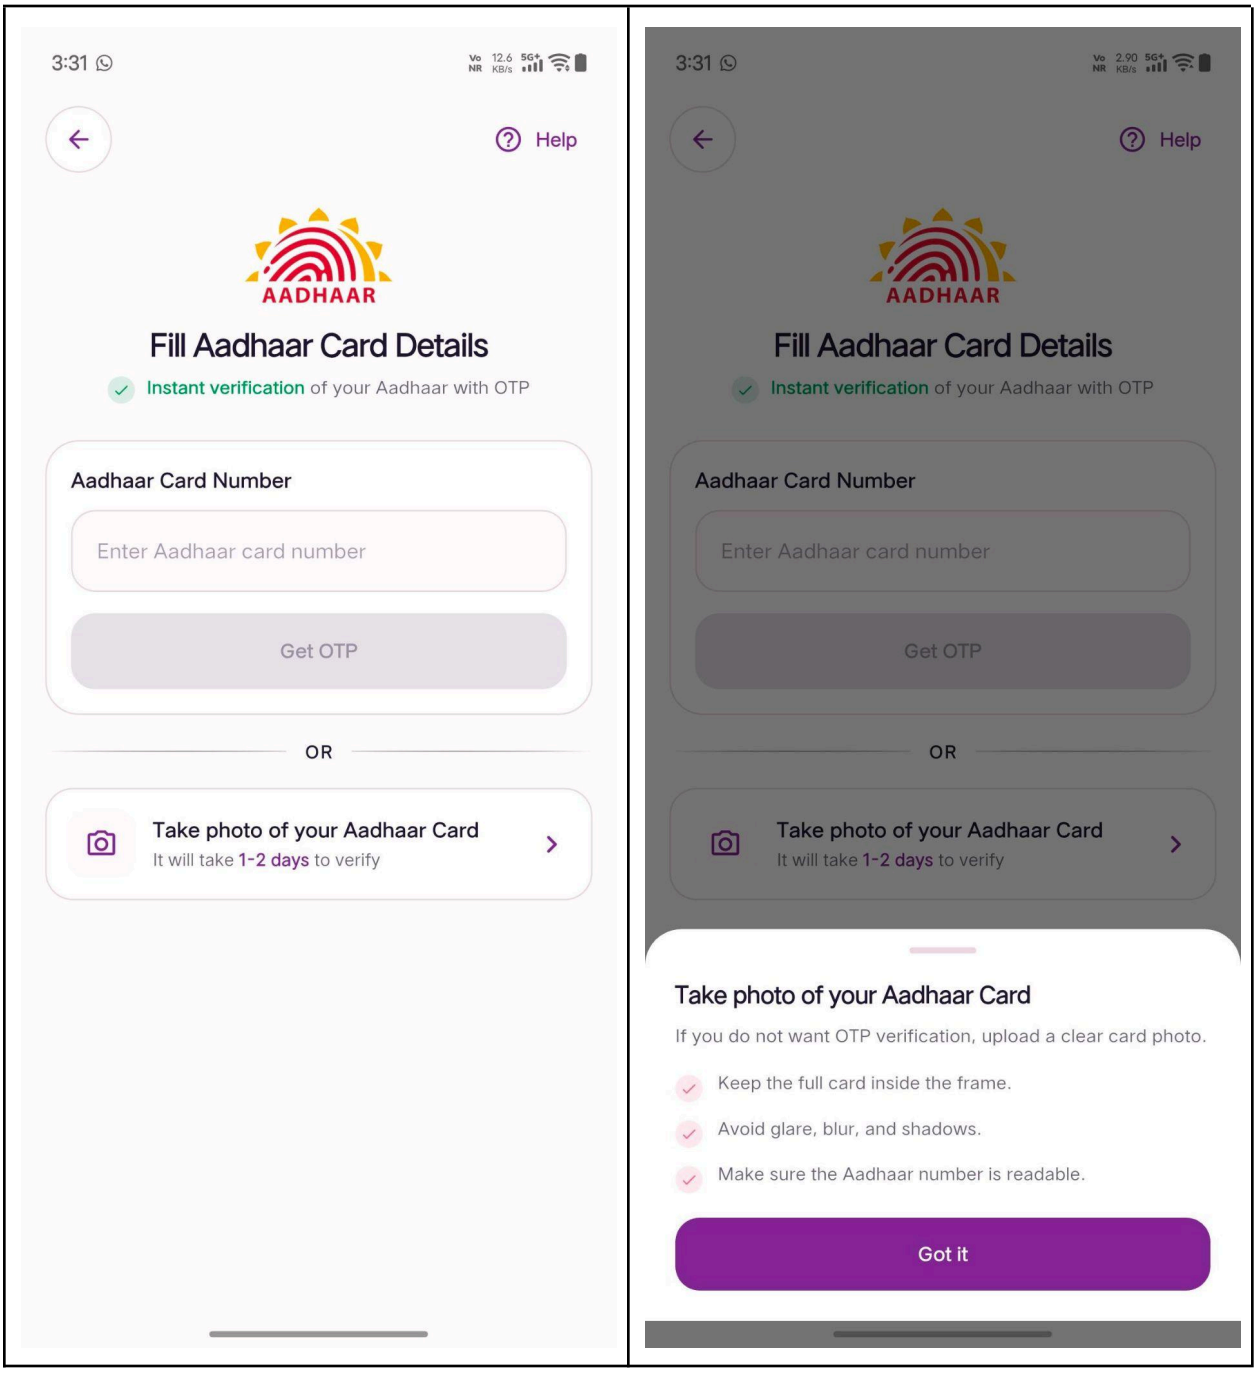
Document Upload Screen:

Implemented document upload functionality with file validation and secure data handling for driver verification.



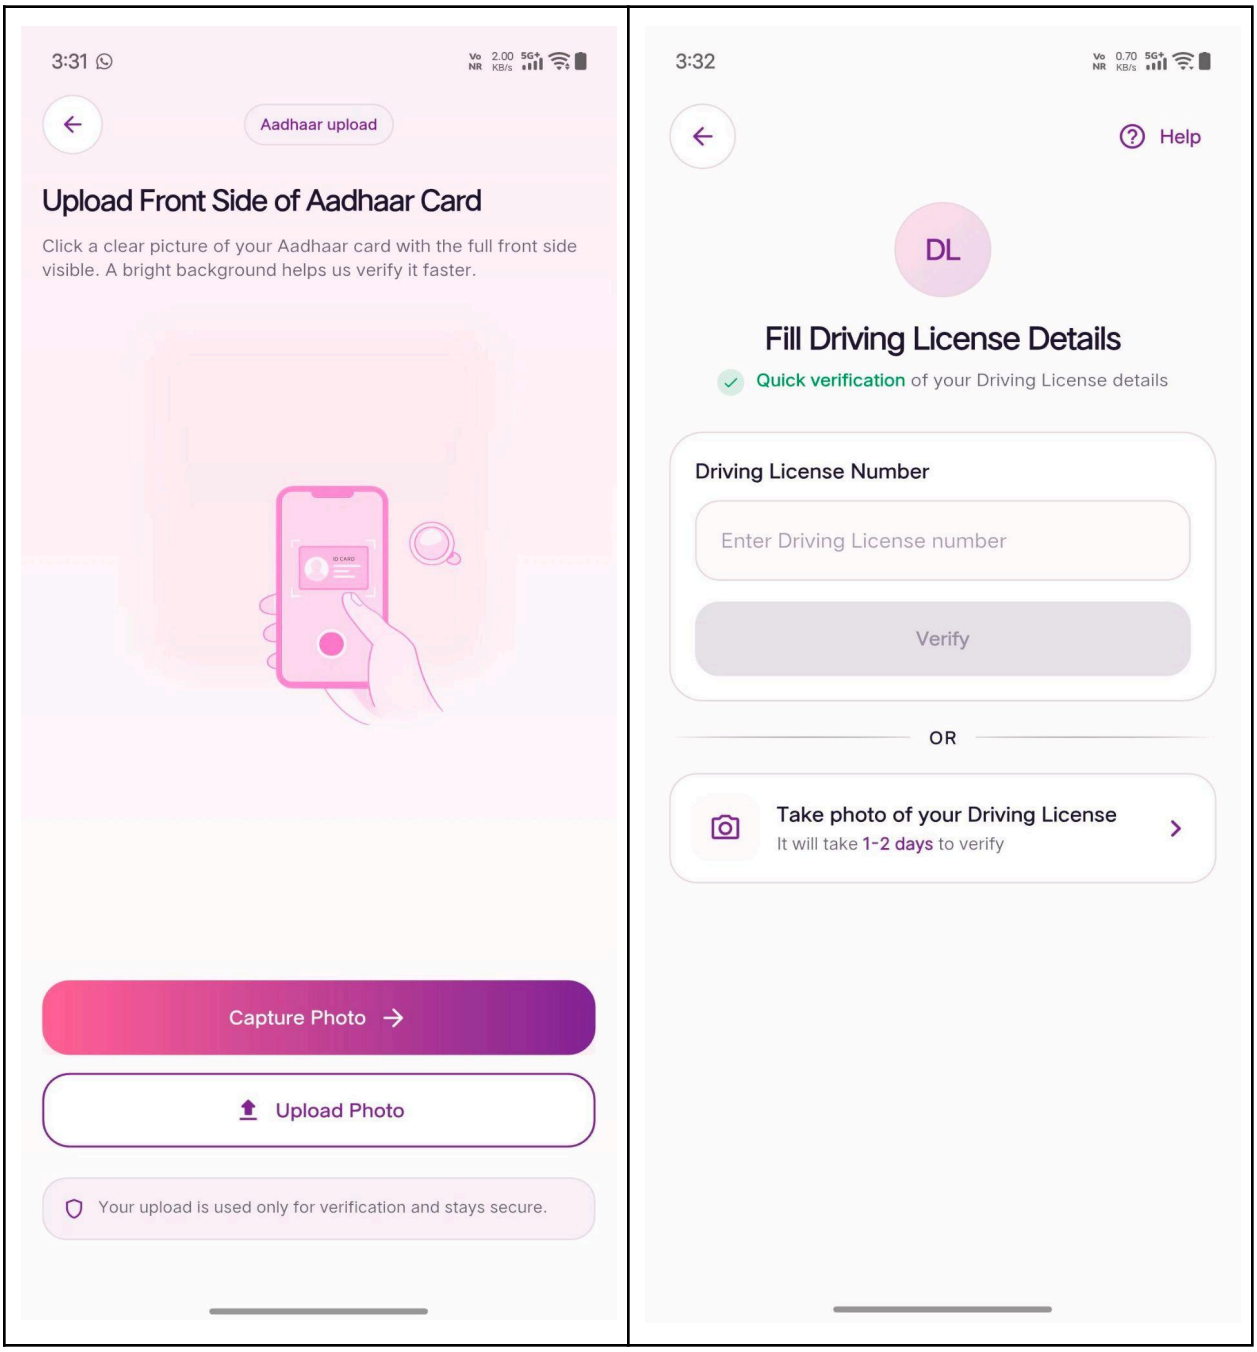
Aadhar upload screen:

Implemented Aadhaar upload and document verification screen in the driver app to securely collect and verify driver identity details during onboarding.



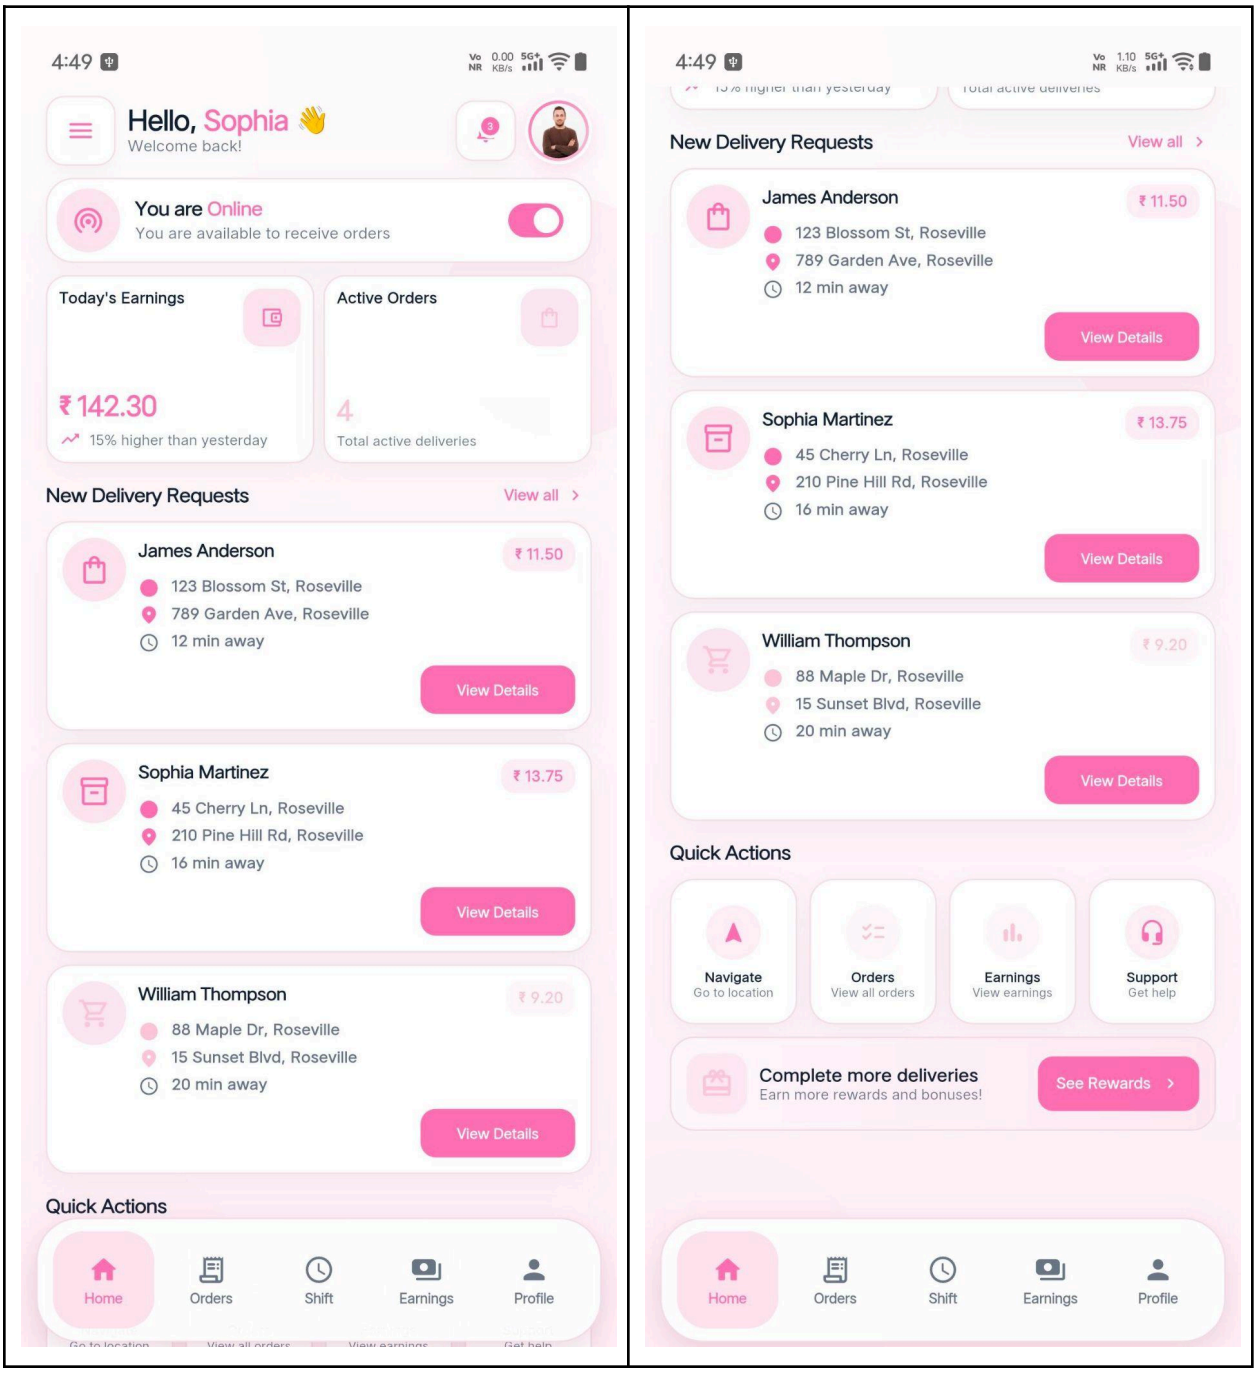
Aadhar upload Screen and Driver License Upload Screen:

Developed Driver License Upload Screen to securely upload and verify driver license details during registration and onboarding.



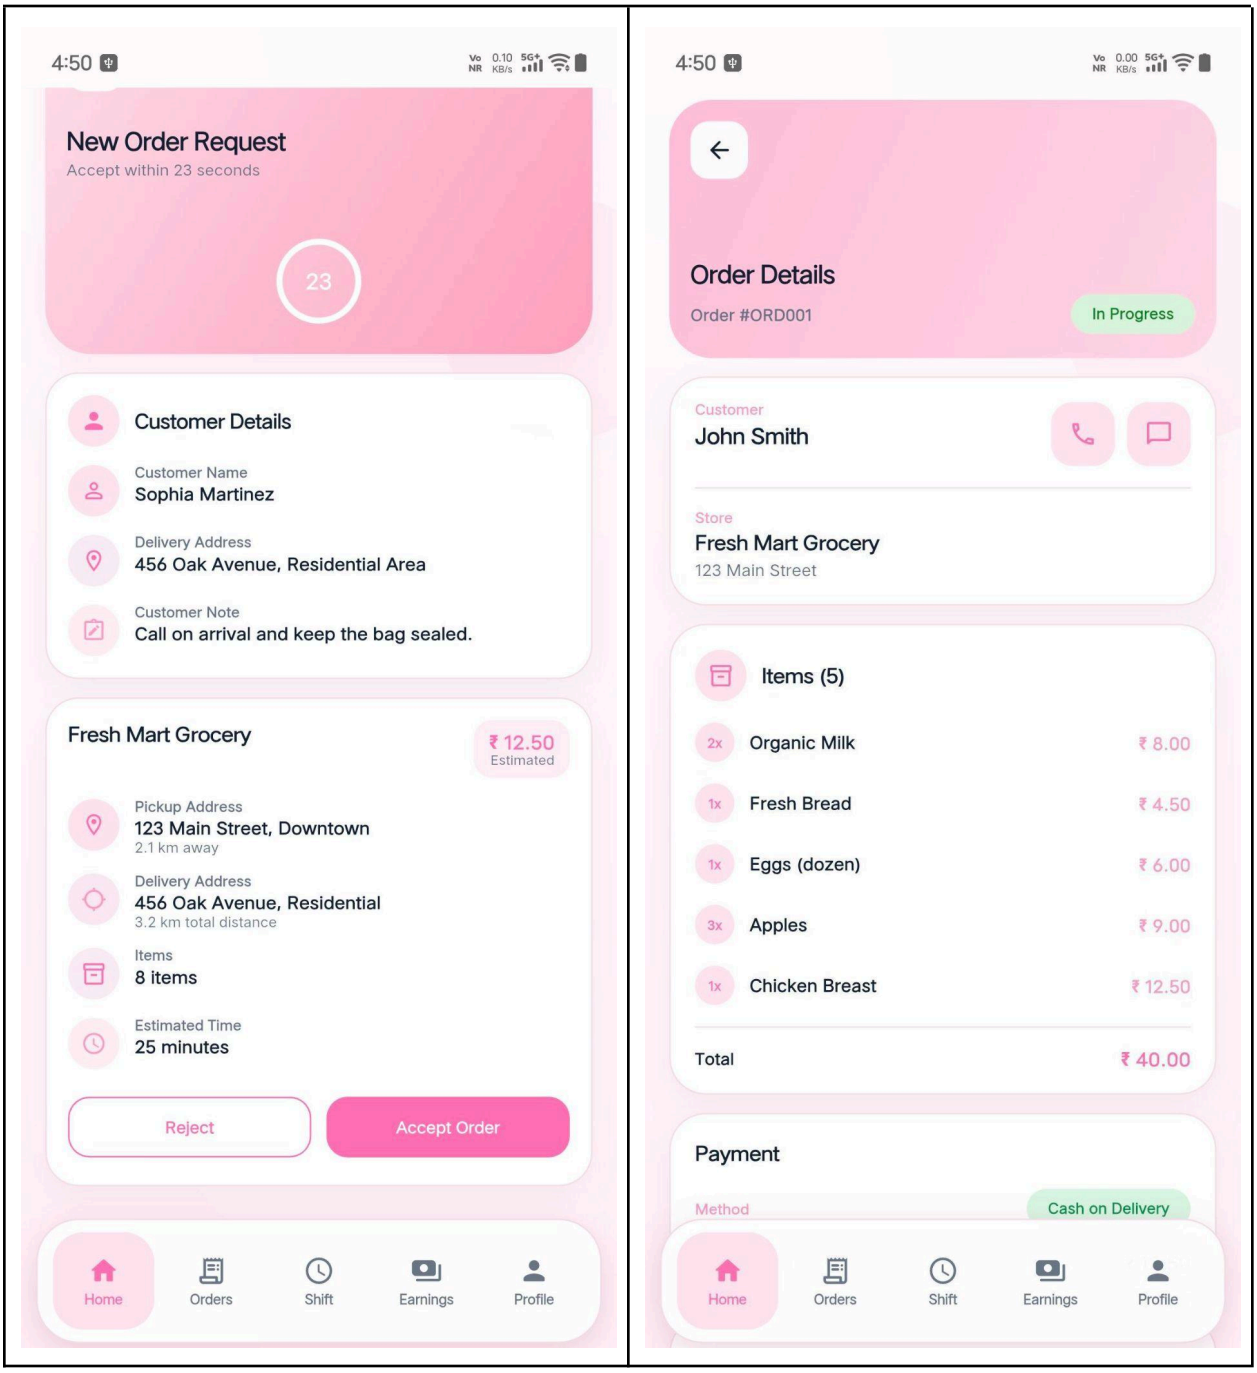
Home Screen:

Driver home screen developed to provide quick access to delivery tasks, order updates, and daily activity information.



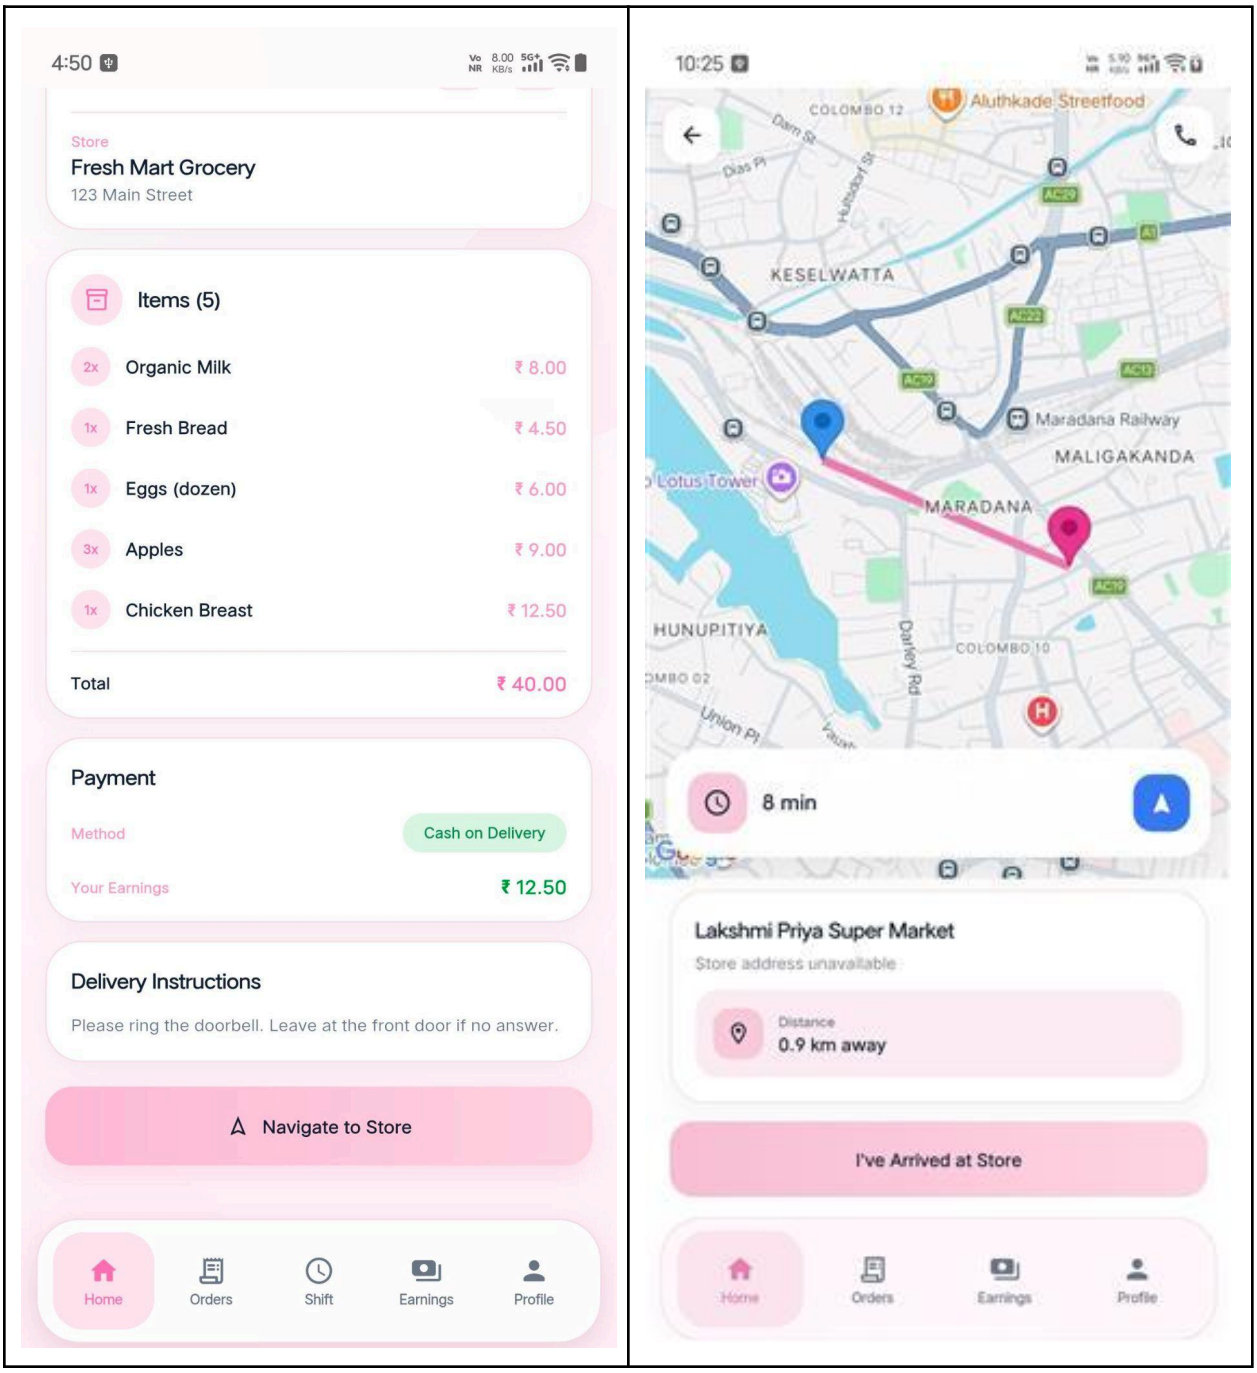
New order Request Screen and Order Details Sreen:

New order request screen developed to notify drivers about incoming delivery requests with order details and acceptance options.



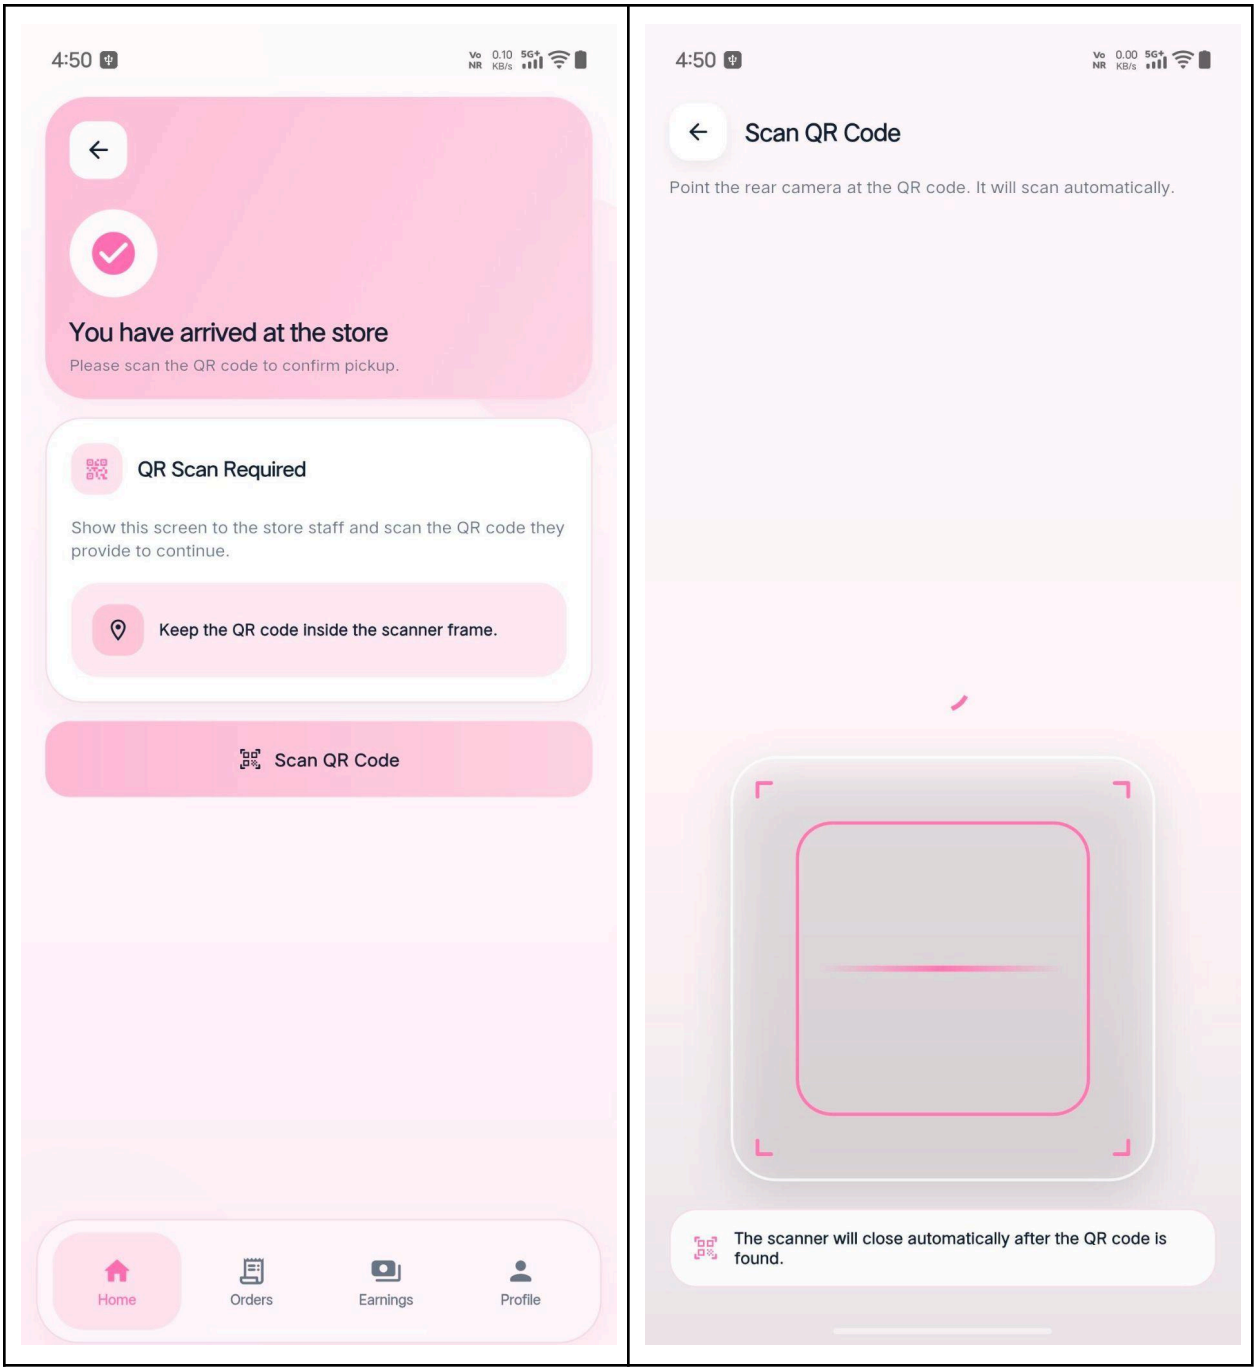
DriverNavigationScreen

Integrated Google Maps for real-time navigation, route tracking, and delivery location management.



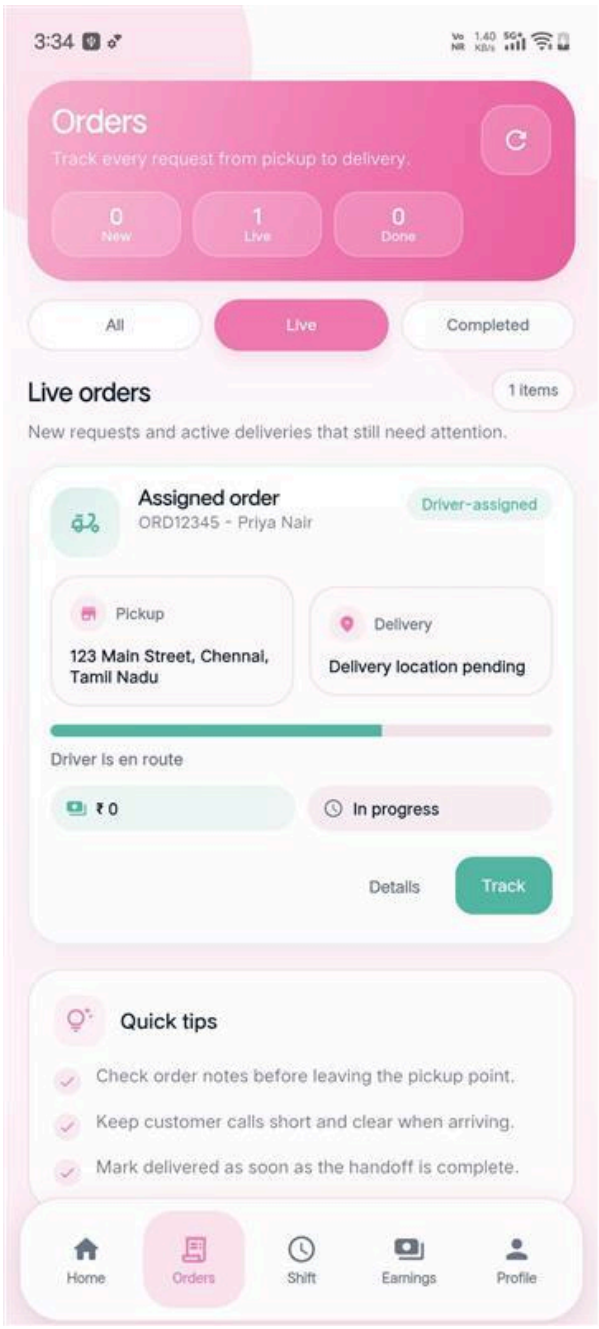
Scan QR Code:

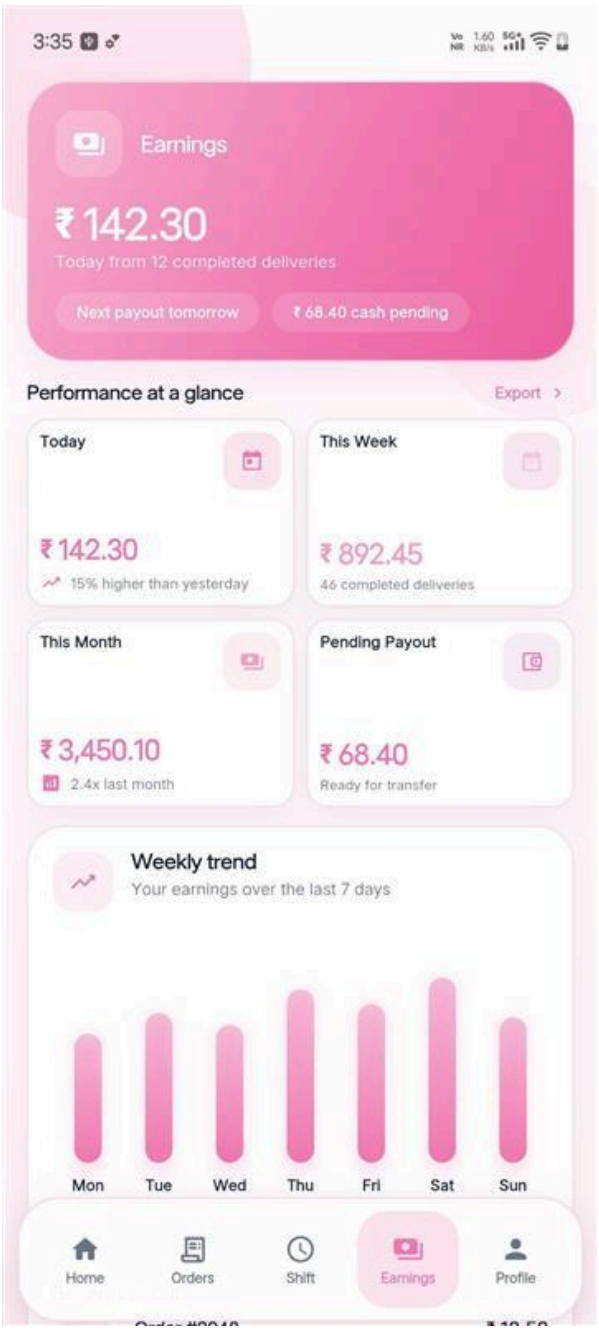
After reaching the store, the QR code available on the bill must be scanned. Delivery can be completed only if the order ID matches.This is to ensure that the order does not get exchanged or mismatched.



Order Screen and Earnings Screen:

Orders management screen developed for drivers to view, track, and manage assigned delivery orders efficiently.





Earning Screen and Profile Screen:

Profile screen developed for drivers to manage personal information, account details, and application settings.

Account Controls

Sign out, deactivate, or delete the account if needed.

Logout

Sign out of this device and return to the login flow.

Deactivate / delete account

Remove access or request account deletion when necessary.

Extra Tools

Advanced features that stronger driver apps usually include.

High-demand heat map

View busy delivery zones and identify strong earning areas.

Fuel tracking / expense log

Track fuel spend and other vehicle-related costs.

In-app training videos

Learn delivery tips, safety basics, and app usage.

Gamification

Levels, badges, and streaks to keep drivers motivated.
